Release Notes: xD3 Firmware V1.3

The xD3 module firmware update applies to all EXS models:

EXS-1 Mk2, EXS-2 Mk2, EXS-3, EXS-3CY, EXS-5.

New Feature: Delete Kit

A **Delete Kit** function has been added to the SETUP | UTILITY menu.

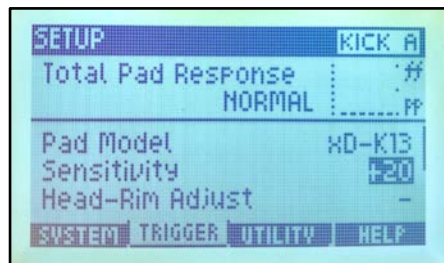

The Delete Kit screen displays the list of installed kits excluding the five factory preset kits.

A listed kit can be selected and deleted from the module.

The currently loaded kit cannot be deleted.

Change: Trigger Sensitivity Setting Range

In the SETUP | TRIGGER menu, the range of the **Sensitivity** setting has been modified.

The new range for all pads is -10 to +20.

The extended value range assists EXS-5 users in setting the sensitivity for the xD-K13 and xD-P13M pads.

Change: Hi-Hat Close Adjustment Setting

In the SETUP | TRIGGER menu, the range of the **HH Closed Adjust** setting has been modified. This change supports the improved setting of the hi-hat's closed point.

For aD-H12 or aD-H14 pad models:
HH Closed Adjust range is -20 to +19

For xD-C12A or xD-X12B pad models:
HH Closed Adjust range is -20 to +100.
